BOBBY CALF STATUS DECLARATION

I will ensure that any bobby calf I send for slaughter is not within the meat-withholding period of any animal remedy or treatment:

- administered to that calf (see note 1 reverse)
- given to the dam before the birth (see note 2 reverse)
- given to any cow that has been used to supply milk to that calf (see note 3 reverse).

Status of Herd

Are any of the animals in the herd under movement for residue control purposes? (see note 4 reverse) YES / NO

Have any of the animals in the herd been vaccinated against Johne's disease in their lifetime? (see note 5 reverse) YES / NO

As part of this agreement I undertake to ensure that all who work with these animals are instructed on the need to comply with these requirements. If I become aware that any calf has been inadvertently sent for slaughter while not meeting any of these conditions, I shall immediately inform Silver Fern Farms Limited.

Declaration

I declare that as the supplier of calves intended for human food, this Bobby Calf Status Declaration is true and accurate, and that I have read, understood and agree that I must abide by the requirements set out on both sides of this form. Unless I advise Silver Fern Farms Limited of any change prior to 30 November 2011, this declaration will remain valid until that date:

BOBBY CALF REGISTRATION / STATUS DECLARATION

- I/We agree to abide strictly by the “Code of Recommendations and minimum Standards of the Welfare of Bobby Calves” as required by the Ministry of Agriculture. **Calves suitable for slaughter shall be at least 4 days old.**
- I/We agree to ensure the calves are fed immediately prior to being penned for collection.
- I/We acknowledge these tags remain the property of Silver Fern Farms Limited and will only be used for the identification of bobby calves for supply to Silver Fern Farms Limited.

The information on this declaration must be accurate. If any Calf is sent to slaughter while not meeting any of these conditions, I shall immediately inform the slaughter plant.

Note 1: Calves treated directly with any antimicrobial agent (e.g. antibiotic or sulpha drugs) must not be submitted for slaughter. Treatment with an approved electrolytic which is labelled to indicate that there is no withholding period is permitted.

Note 2: Where a pregnant cow has been treated with any animal remedy and calves before the meat withholding period of the product has elapsed, then the calf may not be submitted for slaughter until the cow becomes eligible for slaughter.

Note 3: Calves may be indirectly exposed to chemical residues if they are fed milk from a treated cow. If calves are exposed to chemical residues via cows milk, they are not fit for slaughter until after the expiry of the meat-withholding period of any cow providing milk.

Note 4: Residue Movement Control: When animals at slaughter are found to exceed the permissible limit for any animal remedy, pesticide or other contaminant, MAF will place the risk source farm under movement control. This prevents the movement of animals off the farm without a MAF permit. In cases where a farm is placed under movement control after the supplier has supplied a seasonal declaration to the slaughter facility, the supplier is obligated to immediately inform the slaughter facility and submit a new seasonal declaration.

Note 5: Johne’s Vaccination: If you do not know the Johne’s disease vaccination of any animal, you must circle “YES”.

YES / NO

Note 6: Silver Fern Farms will also require suppliers to use orange tag if they are on the MAF Tb Suspect Black leg list.

OPPORTUNITY FOR CALF REARING

“I/We acknowledge and agree Silver Fern Farms may, at their absolute discretion, select calves suitable for rearing from my/our calves submitted for collection as bobby calves, on the understanding Silver Fern Farms will purchase these calves outright at a premium to bobby calf slaughter value

Please sign this form and return it in the postage paid envelope enclosed, or fax (0800 376 156) to us at your earliest convenience.
